I knew we were in trouble,
Never thought that it could be so bad.
Somebody burst that bubble,
Destroying all the good things we once had.
Now you're asking me to find
The key to everything we left behind.

It's such a mystery
Why we should fail to see
That love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
It's easy to exist in harmony.

People deep in conversation,
Agreeing just to disagree,
Always ending in frustration.
Is everyone so blind we cannot see
The games that people play
Will keep us hoping for a better day?

It's such a mystery
Why we should fail to see
That love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
To living in harmony.

Some day I know that we'll discover there's just one
way.
I really do believe that if we hold on, just hold on,
The dreams we dare to dream will all come true.
Now you're asking me to find
The key to everything we left behind.

It's such a mystery
Why we should fail to see
That love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
To living in harmony.

Don't know why it's such a mystery.
Love can heal this broken dream.
This is my philosophy
Living in harmony.
Don't know why it's such a mystery.
Love can heal this broken dream.
This is my philosophy
Living in harmony.

It's such a mystery.
Why we should fail to see
You know love, love can heal this broken dream?
It's my philosophy,
Tell me, do you agree!
To live, to living in harmony.

It's such a mystery
Why we should fail to see
You know love, love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
This is my philosophy
Life is such a specialty

It's such a mystery
Why we should fail to see
You know love, love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
Living in harmony

It's such a mystery
Why we should fail to see
Don't you know love, love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
This is my philosophy,
I want to set your spirit free

It's such a mystery
Why we should fail to see
You said love, love can heal this broken dream?
It's my philosophy,
Tell me, do you agree
Living in harmony

It's such a mystery
