I've waited a lifetime,
You know it's true
I've found what I've been searching for
My darling it's you
We're star crossed lovers touched by fate
That brought us here together
Not a moment too late

Until this moment I never knew
I ever needed anyone
Just like I need you
No matter what the future brings
You will always be my world my everything

I know there'll be a happy ending
We were meant to be together
I know this is forever
'Cos this love, yes this love
Is all I'm living for
Yes this love
This time I know that I've found my harbour
I've found a home
With this love, with this love, with this love
We will never be alone

You know I've been lost in sorrow and pain
Outside of every circle
I've been out of love's game
Thought I would always be alone
My life has started over now the storm clouds have
blown

I've felt love's hurt,
The loss and the scars
Never would believe
That you could wish on a star
I searched in vain for perfect love
But now I bless the day they sent you down from above.

This time there'll be a happy ending
We were meant to be together
I know this is forever

'Cos this love, yes this love
Is all I'm living for
Yes this love
This time I know that I've found my harbour
I've found a home
With this love, with this love, with this love
We will never be alone

And now there's light shining through our darkest day
At last we've found true love come what may
'Cos this love, yes this love
Is all I'm living for
Yes this love
This time I know that I've found my harbour
I've found a home
With this love, with this love, with this love
We will never be alone

That's all I'm living for
Yes this love
This time I know that I've found my harbour
I've found a home
With this love, with this love, with this love
We will never be alone
