I've seen you in the shadows and I felt you in the breeze
I know you're out there waiting somewhere
Waiting there for me
I've looked in all the places and I've been in all the crowds
Where are you now
Oh where are you now

Someday I'm gonna find you
And I'll know you the minute that I see your pretty face
Someday I'm gonna fall so far in love
That I'll never remember the way I'm feelin' right now
Ooh someday, someday

Everyday I wake up thinkin' this might be the one
The one I've waited for forever
And prayed would come along
To end this lonely empty feeling
Deep inside my soul
Somehow I know
Oh, somehow I know

Someday I'm gonna find you
And I'll know you the minute that I see your pretty face
Someday I'm gonna fall so far in love
That I'll never remember the way I'm feelin' right now
Ooh someday, someday
