Now I'm divided like a flock of birds when excited
And picture circles in the sky
You can't believe me
Like all of the others who leave me
And feel their shapes across the aisle

Twirl things around us
And the shadows they left as they found us
Or running fingers through your hair
It's life that ended and the tracks that they left as they
ascended
They'll picture circles in the air

Sometimes in her eyes, I see forever
I can't believe what we've found
I know in time, we'll be together

And now our love will make this sound

Now I'm divided like a flock of birds when excited
And picture circles in the sky
You can't believe me
Like all of the others who leave me
And feel their shapes across the aisle

Sometimes in her eyes, I see forever
I can't believe what we've found
I know in time, we'll be together
And now our love will make this sound

Sometimes in her eyes, I see forever
I can't believe what we've found
I know in time, we'll be together
And now our love will make this sound
