### "The Opposite"

Visit "[The Opposite](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Everybody knows that the world is round  
& what goes up has to come back down  
Well I wonder what everybody would do  
If the opposite were only true

If the world was square & they also found  
That what went up never did come down  
It would be too good, just too good to be true  
'Cause then you'd love me & I wouldn't love you

You'd be the one to make for a date  
& I'd be the one to show up late  
You'd be the one to cry every night  
& that would really serve you right

(x2):

But the world is round, it's so very round  
& what goes up has to come back down  
So until the day that the opposite's true  
There is really nothin' I can do  
Except to go on lovin' you

(repeat & fade):

Except to go on lovin' you
