Perfect Combination
Preston Glass and Narada Michael Walden

Two hearts
Together we're a harmony so right
Two sparks
United we're a fire burning bright
For the true
Always brand new
Right from the jump
We had a hunch
That we had everything

Perfect combination
Love plus you and me
A perfect combination
We couldn't ask for any better
Perfect combination
We fit to a tee
A perfect combination
With all it takes to last forever
Together

So deep
Inside we share a feeling that's so rare
So sweet
Just knowing that we are a special pair
Right on time
We're two of a kind
And heaven knows this love will grow
Stronger every day

Perfect combination
Love plus you and me
A perfect combination
We couldn't ask for any better
Perfect combination
We fit to a tee
A perfect combination
With all it takes to last forever
Together

We can conquer any mountain
Just as long as we're together
Cause as one we are an endless fountain
Over flowing with love, perfect love

Perfect combination
Love plus you and me
A perfect combination
We couldn't ask for any better
Perfect combination
We fit to a tee
A perfect combination
With all it takes to last forever

Perfect combination
Love plus you and me
A perfect combination
We couldn't ask for any better
Perfect combination

Baby, yeah
You and me, just you and me yeah

Baby, perfect combination
Love plus you and me
A perfect combination
We couldn't ask for any better
