I've never lived among the folks in high society
When it comes to this world's riches I've got none
But the love that I've been hungry for has finally come
to me
And I know without a doubt girl you're the one
You're the one I wanna be with when each day is done
And your arms I want around me at the rising of the
sun
You're the one I wanna eat with you're the one I wanna
sleep with
You're the one I wanna love with you're the one

Just a poor girl from the backstreets of a little country
town
Wantin' nothing more from life than happiness
I just want to be your woman always follow you around
Cause I know without a doubt you're the one
You're the one I wanna be with...
(You're the one)

I swear upon this love of mine we'll never be apart
I'll take care of you and never let you down
I'll always be your woman hold you close against my
heart
And be happy just to follow you around
Cause you're the one...
