Let's love while the night is young
Let's love, life has just begun
To become a dream, a dream of reality

Let's love, press your lips to mine
Let's kiss for that thrill divine
As we realize there's no one but you and me

I find your arms so inviting to me
So what am I to do?
The thrill of your touch is exciting to me
While our hearts are reeling, while we have this feeling

Let's love till the end of time
Let's love, leave the world behind
Now that we have found the wonderful glory of
Two magic words, " Let's love"

Ahhh, let's love

Let's love, life has just begun
To become a dream, a dream of reality

Ahhh, let's love

Let's kiss, for that thrill divine
As we realize there's no one but you and me

I find your arms so inviting to me
So what am I to do?
The thrill of your touch is exciting to me
While our hearts are reeling, while we have this feeling

Let's love till the end of time
Let's love, leave the world behind
Now that we have found the wonderful glory of
Two magic words " Let's love"

Let's love
Let's love
