(Jerry Foster - Bill Rice)

It only changes her touch to turn your world around
A kiss from her can start your life anew
I know it makes you happy to have her in your arms
How proud you are cause she belongs to you.

Once she loved me that much so I know how you feel
You thinks she's gone and loved you from now on
So love her while you can someday you'll understand
Her dreams are built of sand once she loved me that
much.

--- Instrumental ---

I know she makes you happy when she is in your arms
How proud you are cause she belongs to you
So love her while you can someday you'll understand
Her dreams are built of sand once she loved me that
much...
