I've been a snoozing and a bluesing and a cruising
around,
I got no friends, and people always put me down
I've been sleeping in a cars and a bars with the stars
I got no food except for what's in this jar

Chorus

I'm just a product of your industrial revolution
Just a end to a means with no solution
I got no place to go but an institution

I've been pushed around all of my life,
Last week a guy came at me with a knife.
Somebody said he works for Mayor White
Whistle-----

Lead Break

Chorus

I'm just a product of your industrial revolution
Just a end to a means with no solution
I got no place to go but an institution

Mr. Mike was a fright last Christmas night
He got me thrown outta town, I couldn't put up a fight
He was having a ball at the mall in the hall
As I took one last swig of alcohol

Chorus

I'm just a product of your industrial revolution
Just a end to a means with no solution
I got no place to go but an institution
