Sweet Mother Earth
Sweet Mother Earth

The life you give us,
Is the life we've taken
It's our own nature
And we're throwing it away
You provide the cures
That we cannot see
Resources are there
But they're being wasted away

Sweet mother earth
Sweet mother earth

Throwing out the waste
Water wasting away
Covering the crimes
And there isn't any guilt
She's fighting to survive
Racing the sands of time

Look around
Can't you see
This world we really
Really need
Look what our lives
Our lives would be
What will the future
The future bring

Sweet mother earth
Sweet mother earth
Sweet mother earth
Sweet mother earth
