Please don't go away (little girl, won't you stay?)
Let me hold you in my arms (little girl, won't you stay?)
Let me kiss your lips and thrill to your charms
Please don't go away
Please don't go away

I could never find (little girl, little girl)
Find a precious love like yours (little girl, little girl)
Won't you hurry to my arms and stay
Please don't go away
Please don't go away

If I could call you mine little girl very dream I'd dream
would then come true
Loving you, little girl
If only you would care, say you care little girl
Please tell me that you'll stay
Please don't go away
Please don't go away

[piano]

If I could call you mine little girl very dream I'd dream
would then come true
Loving you, little girl
If only you would care, say you care little girl
Please tell me that you'll stay
Please don't go away
Please don't go away

Please don't go away
Please don't go away . . .
