I wasn't looking for your love  
You flashed an innocent smile  
You were more than I've ever dreamed of  
You made my life worthwhile

Can't live without your love  
I need you more than the air that I breathe  
Can't live without your love  
You light the sky with a message that reads

Once in every lifetime  
A stroke of luck comes our way  
Don't you let this chance pass us by  
This gift from heaven should stay

Can't live without your love  
You light the sky, you're the air that I breathe  
Can't live without your love  
You got the power, you're the strength that I need

There was a time life seemed so unkind  
It was a total surprise  
To think I've seen one of life's certain dreams  
An angel in disguise

Can't live without your love  
I need you more than the air that I breathe  
Can't live without your love  
You got the power, you're the strength that I need

Can't live without your love  
You light the sky, you're the air that I breathe  
Can't live without your love  
You got the power, you're the strength that I need

I'll need your love, baby  
Can't live without you  
Can't live without your love  
I need you baby
