Superman

I walk this lonely road tonight waiting for you
Don't leave me in the dark tonight
I've seen you're pretty face somewhere before
So hypnotic so exotic too

I know what is coming I can except my fate tonight
I know that tonight...
...

I'll be you're superman baby I'll take away you're
pain
I'll be you're superman honey I'll save the world
today
I'll be you're superman even when no one can
I can see straight through you and you know it to...
Superman

Why would you put yourself in a situation

With guys that don't care
Don't you know that I will always be there
I'll lift you up when they will put you down
I'll take that sad frown and turn it upside down
Don't you know that I can turn this thing around

I know what is coming I can except my fate tonight
I know that tonight...
...

I'll be you're superman baby I'll take away you're
pain
I'll be you're superman honey I'll save the world
today
I'll be you're superman even when no one can
I can see straight through you and you know it to...
