Get born  
And when you see the light you wanna close your eyes  
Grow up  
And when you do it's like a boring day at school  
Sail away  
And when you sail away you notice there's no wind

Oh you'll never find the time to make your future look  
Bright  
I wanna see a smile on your face when your old  
You know the future's yet to be told  
Press hold, press hold, press hold

I know you wanted to grow, as a person inside  
But all your dreams collide

Drive away  
And when you drive away you notice there's no road  
Fly away  
And when you fly away you notice there's no heaven  
Run away  
And when you run away you notice there's no ground  
Grow old  
And when your old you die and when you die your dead

So you'll never find the time...

I know you wanted to grow as a person inside  
But all your dreams collide  
And everybody's alone with their person inside  
And all your dreams are lies

Meanwhile I keep rolling make my time innocent  
I wanna press hold and colour the grey  
Meanwhile I keep rolling make my time innocent  
Without your boundaries I'll be ok

I know you wanted to grow...
