(Around the world, around the world)  
(Around the world, around the world)  
(Around the world, around the world)  
(Around the world, around the world)  
(Around the world, around the world)  
(Around the world)

I can't lie I'm so hot  
Every time I'm with you  
Where we go, I never know  
But you do the most  
Every time I'm with you

When I think, when I think  
Think about, think about  
What you do, what you do  
I go to another place in my mind  
When I think, when I think  
Think about, think about  
What you do, what you do  
I just wanna be with you all the time

Can't ever let you go, you gotta know  
I lose control, when you take me there  
When you're dreaming too, don't ever wake me  
Cuz everything you do takes me  
(Around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me

Look at me, I'm falling deep  
Deeper than I've ever been before  
I admit, you're the perfect fit  
I'm so convinced I've never been so sure

When I think, when I think  
Think about, think about

What you do, what you do

I go to another place in my mind  
When I think, when I think  
Think about, think about  
What you do, what you do  
I just wanna be with you all the time

Can't ever let you go, you gotta know  
I lose control, when you take me there  
When you're dreaming too, don't ever wake me  
Cuz everything you do takes me  
(Around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me

All around the world, all around the world  
All around the world, all around the world  
Tokyo, Mardi Gras, Boston, here we all go  
London to L.A., Denver, East Chicago, go

Can't ever let you go, you gotta know  
I lose control, when you take me there  
When you're dreaming too, don't ever wake me  
Cuz everything you do takes me  
(Around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me (around the world, around the world)  
Takes me, takes me

You take me, take me  
All around the world, all around the world  
(Around the world, around the world)  
(Around the world, around the world)  
(Around the world, around the world)  
All around the world, all around the world
