"Billions"

Visit "[Billions](#)" on MotoLyrics.com

3:30 in the morning time
Watching my lover sleep
With my heart wide open
All this racin in my mind
Thoughts of lover's lingering
And my eyes wide open
Been around the world
But the roads lead back to you
And if it's zero gravity I feel pulled right back to you

Nothings impossible,
With a love so astronomical
So trust when you watch me go
I'll orbit back to you
Cause I've been to different atmospheres
Never did I breathe so clear
I know there's billions in the world
But I'll always come back to you babe
Yeah, you, you, you, you uhu, mhm

All the seasons I've survived,
Going up and down this dream
With my eyes wide open
I've seen love heal the broken
It's made me proud to sing
With my life wide open

Nothing's impossible,
With a love so astronomical
So trust when you watch me go
I'll orbit back to you
Cause I've been to different atmospheres
Never did I breathe so clear
I know there's billions in the world
But my love's coming back to you
Yeah know there's billions in the world
But I'll always come back to you babe
Yeah, you, you, you, you uhu, mhm
Know there's billions in the world
But I'll always come back to you babe

Today I have too many tattoos to go back to status-quo
And I've heard too many yeses just to die about a no

I've seen too many smiles to be flustered by a frown
And I'm used to being so high up you can't just talk me
down

I hot-boxed my apartment just to come up with this
song
Writers block kept winning and I let it tag along

Cause IÂ've been to different atmospheres
Know thereÂ's billions in the world
But IÂ'll always come back to you babe
