### **"Sign Language"**

Visit "[Sign Language](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Everytime I see a sign, you could say  
It's a coincidence  
And you could say I dream them up  
That it makes no sense  
But I don't really think about it I don't really know about  
it I can't begin to doubt it I don't need clearance

CHORUS:

So let's try to levitate our minds Learn to appreciate  
this time So let's stay up late, go outside Look, listen,  
touch and feel, the signs Learn to let go of the wheel,  
sometimes Learn to believe in what's real, use our eyes  
Let's learn the language

I know we can learn to stay awake  
To see the signs tonight  
A message from somewhere that everything's  
All right... (It's all right... 4x)  
Think about it  
Learn about it  
We all kinda know about it  
We could get lost without the signs
