There are things that make you feel alive
Like the first time you learn to ride a bike
Watch the ground move beneath your feet
You're that way to me

There are things that make you feel at home
Like the voices that you've always known
Close your eyes and home is where you'll be
You're that way to me

And I have waited a long time
To find someone who's got a heart like yours
And just when I'm satisfied that you're mine
You show me that there's something more

There are things that keep you wanting more
Like the first sight of a distant shore
Then you know there's something more to see
You're that way to me

There are things that take you by surprise
Like the first time you see your father cry
I never knew that love could go that deep
You're that way to me

And I have waited a long time
To find someone who's got a heart like yours
And just when I'm satisfied that you're mine
You show me that there's something more

You showed me life in things I've known before
But I hope our love is something more

There'll be a time you wanna give your life away
Just like Jesus dying for his bride
She was more than anyone could see
You're that way to me
