"Bullets"

Don't look now but when it rains it pours and your
already in the middle of a storm
Where you gonna go
Don't be fooled I know your tough but you wont survive
even if you try
To make it on your own
Ill take the pain
Ill take it all away

When the weight of this world starts dragging you
down
You know your not alone
Let the bullets fly!
Let the bullets fly!

When it seems like its spinning in a free for all
And it feels like they have come to take it all away
Ill take a bullet in the face for you
Ill take a bullet in the face for you
Ill take the pain
Ill take the pain
Ill take the pain
Ill take the pain
Ill take it all away

When the weight of this world starts dragging you
down
You know your not alone
Let the bullets fly!
Let the bullets fly!

When life takes its toll and you feel like your losing site
It's not just your mind
Ill be by your side
Let the bullets fly!
Let the bullets fly!
