Let's lay this puppy down  
Hey, hey, hey, hey

The clock stopped tickin' sister  
Frozen at the time it was  
When you decided you done all  
That you could have done

Livin' by a sundial  
In a world that revolves 'round you  
But you ain't done shit  
Since neon was in  
And this planet's missing you

Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round  
Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round

Your head is two steps forward  
But your body's three steps back  
Ya' gotta check the rearview mirror  
But keep following the map  
Say things are lookin' up now  
But so is anything when you're on your back  
Best bust a move break in your shoes  
'cause work is just a fact

Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round  
Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round

Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round

Maybe you just need direction  
Maybe some affection maybe something to save  
Or maybe all the maybes are  
What got you so damn lazy and  
Put the lock on your cage  
Hard to break the habit  
But once you crack it you're half way  
Living life under daylight  
With a smile across your face

Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round  
Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round

Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round  
Come on baby make daddy proud  
Instead of sittin' there and watching the world go  
'round
