If we could take a day
To just get away
Let all our problems fade and decay
Let the weight slip away
Just you and me
Under a palm tree

Oh I love, oh I love oh I love just to see you smile

If you and I
Could get on a plane
Head for Italy or Spain,
To me it's the same
As long as you're happy,
Then I am perfect
and we won't need anybody else

All I need, all I need, all I need is to see you smile
All I need all I need all I need is to see you smile
I'm not asking for much, just to live and to love
everyday with me

Take a break, take a breath, take a rest and let's get
away

I'm picturing slow
Motion we go, in our fancy clothes
Crack a bottle of merlot
And we see our smiles
Parted by miles and a candle lit cloth
At a fancy restaurant

And I love and I love and I love all of our long talks
About life about love about friends and the things that
we dropped
Just to be you and me far away over seas and miles
And I love, and I love, and I love just to see you smile
