What you don't know  
Won't hurt you  
Maybe the lies are true  
Try to remember, try to forget  
Those yesterdays bleeding through

You'll never see me coming  
You'll never know my name  
Try to remember, try to forget  
But you'll never be the same

I could do anything  
I could go anywhere  
I could be anything  
To anyone tonight

I could do anything  
(just let me sleep for a little while)  
I could go anywhere  
(just wanna sleep for a little while)  
I could be anything  
(just let me sleep for a little while)  
to anyone tonight

I'm already going  
I'm already gone  
There's a stranger in my place

You'll never find me  
But I'll get along  
Cause the angels know my face

La la la la  
La la la la la la  
La la la la la laaaa

La la la la  
La la la la la la  
La la la la la laaaa
