I can stay with you a moment  
We can wash our fears away  
I can stay with you for an hour  
But nothing will really change

Because I can't see the storm for the clouds  
You can love me but it never works out  
No I can't see the storm for the clouds  
You can love me but it never works out

If we hold on to this forever  
You'll find it's all the same  
If we hold on for much longer  
Nothing will ever change

Because I can't see the storm for the clouds  
You can love me but it never works out  
No I can't see the storm the clouds  
You can love me but it never works

But nothing will really change  
And I don't understand  
Any more about you  
And I can't comprehend  
How to live without you

And I am here  
And you are there  
Will it always be the same?  
Or can we  
Change

And I keep chasing  
As you drift further away  
And you keep chasing  
And I am  
Gone
