Whatever happened to the value of our love

I've seen you change

I've seen it coming slowly, these changes

You're not the same

It's not too late to start over

It's not too late to turn around

What are the things important to you?

Can't be the money

Well I got news for you

Two Souls (should be two souls together)

Two Souls (in the life that we planned)

But you're working obsession is squeezing me

Out of your world

I'd rather live in a doll's house in a small street

Where it always rains

You kid yourself you're working all for me

But older kids play with bigger trains

It's not too late to start over

It's not too late to turn 'round

It's like we live in separate worlds

Can't buy the lost time

I want my share of you

I want my share of you

Two Souls (should be two souls together)

Two Souls (in the life that we planned)

But you're working obsession is squeezing me

Out of your world

Can't buy the lost time

I want my share of you

I want my share of you

Two Souls (should be two souls together)

Two Souls (in the life that we planned)

Out of your world
