I don't know where this road is going to lead me  
But I'm hoping that with you I can make it through  
I've had enough of this life to lead me  
Right up to the edge of the world I knew

I can't wait just to see another day  
If it means it's one more day that I'm with you  
Down this road we'll look back at all we've known  
Found a love that can't grow old, just passing through  
in the world I knew

I'll be loving your light 'til it fades away  
Tell the world I know 'cause it will never change  
If something feels so right, just can't turn the page  
There's too much to lose, we're just passing through

Time won't stop  
Wish that we could turn back the clock

I can't wait just to see another day  
If it means it's one more day that I'm with you  
Down this road we'll look back at all we've known  
Found a love that can't grow old, just passing through  
in the world I knew

In the world I knew, in the world I knew, in the world I  
knew  
In the world I knew
