Middle of the night I hear you tap against my window
You and I look at the sky and talk about tomorrow
All our dreams and where we'll be
Doesn't matter as long as you're here with me

Starlight, star bright
You're the only star I see tonight
I don't have to hope and pray that you'll be mine
Cause I'm close enough to count the colors in your eyes
Oh how you shine
I feel our hearts as they intertwine
You're my reason, cause you've made me fall
And now I don't have to wish at all

Do you read me like a book or see me as a painting?
Front to back and side to side, baby you just get me
I stay this way, it never fades
It's you that keeps this smile on my face

Starlight, star bright
You're the only star I see tonight
I don't have to hope and pray that you'll be mine
Cause I'm close enough to count the colors in your eyes
Oh how you shine
I feel our hearts as they intertwine
You're my reason, cause you've made me fall
And now I don't have to wish at all

You're like the stars
Easy to find
Cause you always shine
