Funny how quickly life can change when a good friend
goes away, so far away
seems like he never left and gone, i wish that he could
have stayed, your far away

Every letter brings a smile to my face
Every letter brings hope to my day
Every letter is an act of your love
All your letters are a gift from above

Your not here with me
and i know that you'll be down forever
even though your gone
all your letters make me feel much better
Your not here with me
and i know that you'll be down forever
even though your gone
all your letters make me feel much better

Time passes, nites turn into days
and im wishin you would say (you'll be back to stay)
Seems like only yesterday,
you were here to save the day
i miss your ways

Every letter brings a smile to my face
Every letter brings hope to my day
Every letter is an act of your love
All your letters are a gift from above

Your not here with me
and i know that you'll be down forever
even though your gone
all your letters make me feel much better
Your not here with me
and i know that you'll be down forever
even though your gone
all your letters make me feel much
better.....
