You said lost, I found your thing, made of glass
But I think you're heart is a muscle
You're heart is a muscle
You gotta look it out
Make it stronger
Try for me, just a little longer
You're heart is a muscle, you're heart is a muscle

You're heart is a muscle
You're heart is a muscle

If I can turn this pain around
I'll fly to where you are right now
I ain't even to the sky
Put that little light up your eyes

We can move, or spend the night alone together
Together we good listening, you don't have much to
say
Wake up you won't pick up the phone whatever
You're probably sleeping, I hope you're still together

I wanna go wherever you are, I wanna be wherever you
I wanna sleep wherever you are

You said lost, I found your thing, made of glass
But I think you're heart is a muscle
You're heart is a muscle
