Well it's late, it's cold  
I just put the phone on the floor  
Before you do something crazy  
I will drive for an hour  
It's really not far  
And it's only a block and a half to my car

Well I'm on the road  
I just wish the whole thing would pass  
At last I see you there shaking  
I can prop you up  
And let the phone ring  
But you know I can't make this a permanent thing

You may change in a month or a year  
But I'll always have time and a place for you here  
If it all goes down or it all goes away  
I will always remember  
Always remember

Well it's late, it's cold  
I just put the keys in the door  
Before I leave you there sleeping  
I will wake you up  
And check on your health  
Cause I need to make sure you take care of yourself

You may change in a month or a year  
But I'll always have time and a place for you here  
If it all goes down or it all goes away  
I will always remember  
Always remember
