Hey Katie
You really look great tonight
I think about you all the time
Your color up my life

Just maybe
(Maybe)
You'll let me take you home tonight
I've gotta have you by my side
To wake up with the sunrise

It's hard to drive when you're
Putting on your makeup
Can't stay in the lines

Shaping up my heart
For all the love I'll be giving to you
I knew it from the start
The starring role for my movie was you

I knew it was you
I'm playing it tough
So you can't change your mind

Hey Katie
About 6 o'clock tonight
I'll be waiting by the curbside
Practicing my lines

Just maybe
(Maybe)
You could help me hit my mark
And I could try to play the part

Memorizing lines
You could build me a pharaoh
I can be Billy Joe

Shaping up my heart
For all the love I'll be giving to you
I knew it from the start
The starring role for my movie was you

I knew it was you
I'm playing it tough
So you can't change your mind
Woohah

Making love
In the middle of the day time
Sun shines hot on my back

Shaping up my heart for
All the love I'll be giving to you
I knew it from the start
The starring role for my movie was you

I knew it was you
It's gonna take a lot to stop my heart
Keep pumping for two
Oh, I knew it from the start

The starring role for my movie was you
And I'm playing it tough
So you can't change your mind
