Met a girl over the net saved our chats on a floppy diskette,
went well for a week or two then it all came unglued.
One night she brb waited up for an hour or three,
then i started to realise she wasn't coming back online.

She frickin blocked me
trust
she frickin blocked me
lalalala
we talked all night then she put my screen name on her
block list and then she clicked ok
Well she told me she was taking a shower and she'd be
back in a half hour,
but she pulled one over on me wtf omfg

I was ticked but not convinced had to make sure before
my ego was minced,
good thing i'm such a wiz signed in on my other name
and yup there she is

she frickin blocked me
trust
she frickin blocked me
lalalala
we talked all night then she but my screen on her block
list and then she clicked ok.

Thats my story as you see never trust a women when
she says brb.
Now it's over and i'm torn but i signed her up for
beastiality porn.

She frickin blocked me
trust
she frickin blocked me
lalalala
we talked all night then she put my screen name on her
block list and then she clicked ok.
