This world  
Has me down  
With problems all around  
Surrounding everything in sight  
But when  
I'm with her  
She makes everything look good  
Then everything's alright

It's me and it's you  
Together whether it be  
Good news or bad times  
I'd never ever leave  
Cause I love the way you make me feel inside  
So come on baby  
Take my hand and let's dance

Now she's  
By my side  
And looking deep into her eyes  
We're all alone in disguise  
The world  
Moves too fast  
But I'll take my chance  
And take some time with her to dance

Because of you I see from  
A different point of view  
But why did it have to take so long?
