Yesterday, I met a guy  
The kind I dream about at night  
He said, come on, let's take a ride  
And I said okay, yeah

Every move he made was really hip  
He's hip, uh huh  
He could be the one to come  
And steal my heart away

(CHORUS)  
He could be the one  
I like his style  
He could be the one  
I'll put his love on trial  
He could be the one  
To make it all worthwhile, yeah  
He could be the one  
He could be the one  
He could be the one  
He could be the one

Got to say he's super fine  
I can't get him off my mind  
I know he's not a waste of time  
He's got it all, yeah

Every move he made was really hip  
He's hip, uh huh  
Got my name and number  
And I'm waiting on his call  
Hey, oh, oh

(CHORUS)

In this modern day and age  
Love's just another passing stage  
Everybody's out to score,  
But love to me is so much more

Let's rock

Hey, oh  
He could be the one  
He could be the one  
He could be the one to  
Make it all worthwhile, yeah

He could be the one  
He could be the one  
He could be the one  
He could be the one  
He could be the one  
He could be the one

He could be the one  
He could be the one  
I like his style  
He could be the one  
He could be the one  
I'll put his love on trial

He could be the one  
He could be the one  
I like his style  
He could be the one  
He could be the one  
I'll put his love on trial

He could be the one  
He could be the one  
I like his style  
He could be the one  
He could be the one  
I'll put his love on trial
