"Look Into The Future"

Visit "[Look Into The Future](#)" on MotoLyrics.com

Look into the future where would it be
Space between the lives whatever will I see, yeah
How long will I wander before I really know
What I'm here to do and where I have to go

Guess I'm coming home
Yes you know I'm coming home someday
You know I'm coming home
I'm coming home some way

There you are my shining start
Can you remember, who you are?
The role that you play from day to day ay-ay-ay
You know it's not, know it's not the only way

Still I'm coming home
Yes you know know I'm coming home someday
The futures brighter now it's not so far away
Guess I'm coming home I'm coming home some way

But still I'm coming home
Yes you know I'm coming home someday
The futures brighter now it's not so far away

It's right around the corner
Just around the corner, oh no
It's right around the corner
Just around the corner, oh no
It's right around the corner
Just around the corner, oh no no no no
It's right around the corner
Just around the corner, oh no no no
