We torture our selves, we pay we die, life is just  
another raw deal  
Institution, searching for that angelfuck, just to find out  
it was all a lie  
We were brought to this world just to destroy it, created  
to extinct each  
Other, the human race breeding hate , enjoying pain  
we are all fed by lies

*We're going down [x2]  
We will burn together [x2]  
We're going down [x2]  
We will all burn and die together, our happy faces,  
Facing the ground*

*Now the world is just an open wound, but we still want to  
go deeper inside,  
We all want more than we could ever spend, we are  
never satisfied*

*We are all waiting for the world to burn, we're all waiting  
for our luck to  
Turn, soon we have all succeeded, we will be smoking  
dollars in eternal  
Nirvana*
