(Pep Love)

Here we here we go

This place

Let's go

Yeah the passing on

Experience amassing

The last thing known

Of the everlasting tongue

My raps are forecasting

The rapture that shall capture

Vast things of fascination

Exasperation of an entire nation

Causes inflammation

We master masons

Paper chasin, brick layin

And playin the game

That we was placed in

From the beginning

To the end ya know

Living is learning

So how could you pretend to know

What you don't

Cause you won't

Benefit from it

I'm infinite

And that's only an increment

Of my elevation

To a higher plane

I contain information

And spread it the same

Apotheosis occurs

When I drop these

Doses of words

Over musical notes

With an impulsive urge

On the verge of a breakthrough

Symbols of sound vibrate the ground

Like earthquakes do

Energy surges

Death to my enemies

Service of justice
Poetical purges of tyrants
I rinse the world of the virus
Like this
Living my life with vibrance
And radiance
On the way to the next apex
Is platinum plaques
And packed stadiums

Ascension

Chorus (2x):

I'm on another plane
Runnin a game
We all one and the same
Come with me
I'll show you what you won't believe
And you can be what you want to be
Ascension
Bigger things, other places
Dimensions, ascension
Where do we go from here?
Ahh yeah
I'll take you there
With this one, listen

Attention, attention
This is ascension
And it would be
Even if I didn't mention it
War, peace, love and hate
The very nature of it all
In a fallen state
It's unclear at best
And if I told you it'd probably
Go in one ear
And out the next but don't fear
We questin to answer questions
Advance to the next progression
Or learning another lesson
Believe it or not
I'm walking on air
And ahh yeah
It feels good
Even if not understood
It's all to the greater purpose
I get subterranean
And rise to the surface
Evolving and revolving

Around the sun
We are men, women and children
Buildin, never yieldin
We livin in killin fields
And are weapon wieldin
Until the void is filled in
Steppin over corpses
Through this metamorphosis
That life offers
A twist of fortune is
The very reason
Every season
Changes and the angels
Sing to the strangers
We trailblazin
Hell raisin
Amazing tales
Of spirit, energy
Physical integration
Me and my niggaz are vigorous
In the days when we headed
To the place where time and space end

Ascension

Chorus (2x)
