Sometimes life is like a roller coaster
Flying away
I get caught up just simply surviving
From day to day
But in the midst of all the lists to do
I need some help to change my point of view
Chorus
Every day I'm giving You everything
Every thought, every word, every song I sing
It ain't no matter what life may bring
I lay it down
Every day you make sense of me in the midst of my
insanity
Give me hope, give me love, give me strength, make
me free
Every day of my life
If I love you with my heart, my soul, my mind
Then my life has found a new direction
It was never mine
'Cause when my heart is truly fixed on you
I find meaning in the things I do
Chorus
Not simply just surviving
There's so much more I'm finding
Than living life so blinded and confused
'Cause where I find my freedom is serving at God's feet
and
I'm listening, searching, just waiting, working
Every, every day
