They wanna

They wanna what?

Get em to slip
Get em to fall
Get em to quit
Get em to pause

At least slow down a bit
You must not have heard my songs
I just go ooh woo ooh
Slow me down no ouu wo

Never get stuck just thinking about it
Making it happen not dreaming about it
Driven like every day giving em everything
Thinking that somebody musta come said
Boy we are ripping away your tomorrows

I'm just face tonight but let this be my stage tonight
Let this be my song tonight gonna be my way tonight
You got some you got some time you got some time
lemme get that
Rock you like tmorow isn't coming
We will ride like it wave tonight

I over came the rejection every time
Gave em my hand every time
Spit in it in my hand told me a lie
Told me to bounce swearing to god
Without their help I would never survive
Well
Now I just think your dellusional
Thinkin that I wouldn't rise
I know that there aint no body w - waiting at the door of
the game to (let me in there)
I know that I gotta just take these tracks and burn em
until they (feel me here)
I know that it's dark and the sun is down but that
doesn't mean that (we are stopping)

I'll tell you right now that I wouldn't bet on my miles per
hour (meter dropping)
My phone is buzzing and everytime I look it's nothing
but (bullshit on it)
Time to put it on silent (t t time to put it on silent)

Get em to slip
Get em to fall
Get em to quit
Get em to pause

At least slow down a bit
You must not have heard my songs
I just go ooh woo ooh
Slow me down no ouu wo

Never get stuck just thinking about it
Making it happen not dreaming about it
Driven like every day giving em everything
Thinking that somebody musta come said
Boy we are ripping away your tomorrows

Look out at this sky tonight look at all this space we got
These people got me figured out wrong cause they
don't see a smile
But but but... you know me better than that
You know that comfortable feeling of home you know
me like that

I know your stone faced and button eyed but inside
You aint got
Nothing to hide with me
Come inside

Come and ride come and let loose
I got a story to tell
So so so pour out the juice
Come and ride

Struck out on a couple tries I tried I was scared not
Got it on the last try last second
Buzzer shot

But it's gone what is gone? the moment
But the memory is here to stay with us
We make the most of our moments by making
memories
With em we hold em pass em we own it
(Own what?)
The night because we use it
This night I wanna share it with youuuu so come and

use it
Come and ride
Come and lose it
Come and find it
Come and ride

Get em to slip
Get em to fall
Get em to quit
Get em to pause

At least slow down a bit
You must not have heard my songs
I just go ooh woo ooh
Slow me down no ouu wo

Never get stuck just thinking about it
Making it happen not dreaming about it
Driven like every day giving em everything
Thinking that somebody musta come said
Boy we are ripping away your tomorrows
