How does it feel when your all alone
Is the pain too much to bear
How does it feel when no one believes in you
When you cry and nobody cares

What do you do when they shatter your pride
Keep it in, while it tears you up inside
Why do you stay when they tell you go
Cause it don't mean nothing on life's bumpy road

CHORUS:

Let em do what they want
Let em have their say
I gotta live my own life anyway
No compromise, No paying your dues
Keep pushing forward they can't stop you

SOLO

So many times I hung my head down low
Growing sick and tired of being kicked around again
Know in your heart what's right and what's wrong
The choice is yours, choose to be strong
