(VERSE 1)

Last month I had a partner Now I don't hear a word  
Last month they tried to slow me down that'll never  
work  
Last year I crashed and fell how would you even know  
Pain is not reason to stop it's just how we grow

Last night I had a dream that you were just a dream  
I swear that it bugged me out picture No you and me  
Last Time I tried to fly I jumped fell down to sea  
This time I'll touch the moon Cudi wait up for me

You don't hear me breathing heavy walk in the park for  
me  
I walked in the dark with you, you were the spark I need  
Just watching you smile is perfect I swear that you  
make me glow  
It's all over my face still no one knows

Last night you called and I ran to pick up the phone  
That's when I said good night baby go make me proud  
Last night I tried to sleep and I couldn't sleep at all  
But judging by how I'm working you wouldn't even know

(HOOK)

Last night you called and I didn't pick up the phone  
Last month I had a partner you wouldn't even know  
This is cause that drama don't hold me back I goo  
Never let them see me sweat that's why no one knows

Last night you called and I didn't pick up the phone  
Last month I had a partner you wouldn't even know  
This is cause that drama don't hold me back I goo  
Never let them see me sweat that's why no one knows

(VERSE 2)

Open ears open eyes I been up times  
But I been down (SO so so) Down  
I'm still not scared to go all in  
I gurantee you I'll throw down  
I'm staring out  
At all these roads at all these rides

And all I know  
Is that this pace is what I choose for me  
Reach out with this yellow paint and paint my blues with  
it  
You see  
Chasin some thing new has left me  
High up and mellow  
Once again  
And I  
Cannot turn it off  
I apologize to people  
Let them know it's not their fault  
And that I feel it more than they do  
And I know I tried to help you use the wings life gave  
you  
But it's all just a memory now  
And like the words in this song  
It got the best of me  
Wrong I can't address it it's gone  
I wont seal it inside  
And I wont dwell til I'm sad  
Man I'm just starting to heat up  
I broke that spell and your mad  
I got this view here to take in  
Cause we just roll with the punches  
This is how champions make it  
Man I'm sorry that I made yall wait

(HOOK)

Never let them see me sweat that's why no one knows

Last night you called and I didn't pick up the phone  
Last month I had a partner you wouldn't even know
