### "Stay"

Visit "[Stay](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I want you to stay  
Never go away from me  
Stay forever  
But now, now that you're gone  
All I can do is pray for you  
To be here beside me again  
\*Why did you have to leave me  
When you said that love will conquer all  
Why did you have to leave me  
When you said that dreaming  
Was as good as reality  
And now I must move on  
Trying to forget all the memories  
Of you near me  
But I can't let go of your love  
That has taught me to hold on  
I want you to stay never go away from me  
Stay forever  
But now, now that you're gone  
All I can do is pray for you  
To be here beside me again  
(Repeat \*)  
And now I must move one  
Trying to forget all the memories  
Of you near me  
But I can't let go of your love  
That has taught me to hold on  
(Repeat \*twice)  
Coda:  
I want you to stay never go away from me  
Stay forever  
I want to stay but I have to go my way  
Oohhhmmm
