Don't you ever turn on me  
I've got something that you need  
It drives you wild  
In the mirror, I'm watching you  
Show me everything you do  
It drives me wild

I like the way you look when there's something that you  
want  
Your mind's an open book when there's something that  
you want  
The lights go off and it's all up to you now  
So give me everything you've got

You think you're clever to tell your lies  
But you can't keep it from my eyes  
Turn around  
Grab a hold of something tight  
And love me baby through the night  
Turn around

I like the way you look when there's something that you  
want  
Your mind's an open book when there's something that  
you want  
The lights go off and it's all up to you now  
So give me everything, I want everything

I like the way you look when there's something that you  
want  
Your mind's an open book when there's something that  
you want  
The lights go off and it's all up to you now  
So give me everything you've got
