When all my days are wanting you  
When all your days are wanting me  
Why can't it ever be?

Tonight, tonight is our night  
Tonight, tonight is our night  
To fall in love so deep in love  
Tonight, tonight is our night  
Tonight, tonight is our night  
We always will remember this one night

This magic night  
When the world will let us be free

When all my dreams are seeing you  
When all my dreams are seeing you  
Why can't it ever be?

Tonight, tonight is our night  
Tonight, tonight is our night  
To fall in love so deep in love  
Tonight, tonight is our night  
Tonight, tonight is our night  
We always will remember this one night
