You had me right there in the palm of you hand  
With your fingers locked in mine  
And with a little sweet talking  
I'd've clung on for all time

It was nothing that you said  
It was everything you didn't say  
And all the tears I've shed  
Won't wash the pain away

We had our moment it was golder than gold  
It was solid through and through  
And in that moment if you'd given the word  
I'd've followed you followed you

[chorus]

Misunderstanding number one  
I thought that you were bigger than me  
Misunderstanding number two  
I thought that I could find myself in you

[chorus]
