Underneath the sky
Driving through the snow
Something in my mind
Pulls me off the road

Got to get it down and out
Before it goes
Got to tell myself
What I need to know

I see you from the thirteenth floor
This hotel has a thirteenth floor
I'm thinking out the window
"Come up and watch a video"

Did you ever see the birth
Or first steps of a tune?
Beautiful to me
An alien to you

It has got a face
Only I could love
And I know my place
Outside the hub

He's someone that you kinda know
He's someone that you'd like to know
You kiss him on the cheek and go
You gotta go and be alone

I see you from the thirteenth floor
This hotel has a thirteenth floor
I'm dreaming out the window
"Come up and watch a video"
