Mmmh....

I just wanna be your man, and show you who I am  
But I won't rush my love for you, if you don't feel it  
too  
Come with me and you will see, how deep my love for  
you can be

If you let me know, then I can let go  
And release me, from you  
If you don't tell me, then I won't break free  
Like a lion in a zoo, but I...

Come with me, and I won't let you go  
Come with me, and love will let you know  
On and on, that I'll be, right here next to you

No one's ever gonna let you down  
Not as long as you got, you got me around  
I'll be, right here next to you

I am feeling it inside please let me stay here for the  
night  
Tell me how you feel just let me know  
Baby, should I stay, or should I go

The days go by, I watch you cry  
Just let me be the one, who wipes away your tears, at  
night
