The eve of life - the gods in anger  
A dying light - the last defender  
Embrace me now - the wind gets colder  
I hide inside my shattered mind

Chaos grows - the end comes closer  
Roaring storms - the hordes of darkness  
Marching on - the sky is bleeding  
No way to escape the power unknown

All strength is gone  
All hope is lost  
All the lights are gone  
See the dragon rise  
Towards the sky  
The age of the damned  
Feel the demonic rage that will conquer all

Death, feeds, life, life seeks death

Life starts to fade away  
Life dies in flames

I saw it come, I saw that deadly sign  
I'm not afraid, I feel no more fear, no more pain  
A century of flames, I need it now  
I need it to die to be free

Through the furious flames  
Pain craves life

Through blazing skies - through endless winter  
On the throne of life - dies the last defender  
The dragon cries - the wind gets colder  
I hide inside my shattered mind

A blast of rage - it lives for your pain  
On dying ground - I walk one last time  
My time has come - my soul is dying  
No way to escape the power unknown

Watch the children of the empty cross

Cry in fear for the wrath of angels  
Blessed are thee, who eternally bleed  
Watch the bleed, watch the sinister bleed  
Souls burning in furious flames  
The sun, the moon in vicious games  
Heavens laughter, the devils greed  
Watch them bleed, watch the sinister bleed  
Watch them bleed, watch them, watch them die

All strength is gone  
All hope is lost  
All the lights are gone  
See the dragon rise  
Towards the sky  
The age of the damned  
Feel the demonic rage that will conquer all

Death, feeds, life, life seeks death

Life starts to fade away  
Life dies in flames

I saw it come, I saw that deadly sign  
I'm not afraid, I feel no more fear, no more pain  
A century of flames, I need it now  
I need it to die to be free

Through the furious flames  
Pain craves life  
Life starts to fade away  
Life dies in flames
