You can abide it 'til your wretches have gone
Until it rips open inside your soul
As you wonder where your friends will go
Until you wander in these fields alone

All I've got is to follow this feeling,
To see where it's leading
All we've got is to follow this feeling
To see where it's leading

You're the sunlight
You're the feeling
The virtue in it all
The virtue in us all

You can't deny it as it takes control
As it pulls the strings and leaves you low
As you wonder where your friends have gone
Won't let you wander in these streets alone

All I've got is to follow this feeling,
To see where it's leading
All we've got is to follow this feeling
To see where it's leading

All I've got is to follow this feeling,
To see where it's leading
All we've got is to follow this feeling
To see where it's leading

You're the sunlight
You're the feeling
The virtue in it all

You're the sunlight
Graceful feelings
The virtue in it all
The virtue in us all

The virtue in us all

The virtue in it all

If I can't find my simple life,
Can I find you?
I can't find my simple life,
But I found you

You're the sunlight
You're the feeling
The virtue in it all
(The virtue in us all)

You're the sunlight
Graceful feelings
(Graceful feelings)
The virtue in it all
The virtue in us all

The virtue in us all

You're the sunlight
You're the feeling
The virtue in it all
The virtue in it all
The virtue in us all
