Familiar, this sounds so familiar
You tell me I'm a drama queen
You act like you don't care
You look right pass me
Like I was a ghost
Someone you don't even know
I don't know why I still love you
When all you do is make me

Chorus:

Cry, cry, cry baby
I don't know why I think you're gonna save me
You just stand and watch my tears hit the floor
Like it doesn't even matter anymore
I don't really wanna leave tonight
But I don't want to be your crybaby

Lonely, I can take being lonely
I've kinda gotten used to it
You treat me like you don't know me
Or maybe you never did
They say there's nothing to it
Oh someone's gotta do it
So I'm telling you goodbye
And all I wanna do is

Chorus

I don't really wanna leave tonight
It rips me apart inside
But I'm not gonna be your
Cry, yeah babe no,
I'm not gonna be your cry, crybaby
You just stand and watch my tears hit the floor
Like it doesn't even matter anymore
I don't really wanna leave tonight
But I don't want to be your crybaby
No...no..no
